

Power from the Sun & Water from the Air: Off-Grid Life Sustaining Solutions

Aldelano Solar Cold Chain Solutions™ Unveils Breakthrough Technology Worldwide

Ontario, CA—Over 100 leaders from 11 countries and five continents attended the launch of the [Aldelano Solar ColdBox™](#) at the yearly leadership conference, Gathering of Eagles, hosted by successful business entrepreneurs and owners of the [Aldelano Corporation](#), Al and Hattie Hollingsworth of Ontario, CA.

The industrial-grade, portable, solar-powered cold storage mini-warehouse was the featured guest of the event where attendees had the opportunity to experience first-hand the unit's refrigeration and freezing abilities as well as its water and ice production and renewable auxiliary power supply.

Founded in 1968 by Al Hollingsworth, the Aldelano Corporation is a national leader in customized assembly packaging and warehouse services and is one of the nation's leading contract packaging companies with operations nationwide.

Experts estimate that 40% of the developing world's food supply is wasted, much of it because cold storage is not available. "On a national and local scale, what separates the 'haves' from the 'have nots' is often their access to dependable infrastructure—electricity, clean water, refrigeration. The Aldelano Solar ColdBox™ was created as an alternative to this missing or unreliable infrastructure that cripples communities in the developing world," Hollingsworth says.

In addition to food waste, worldwide, water-related diseases claim the lives of one out of every five children under the age of five. The optional Aldelano Solar WaterMaker™ generates up to fifty gallons of safe drinking water each day by extracting moisture from the air. This feature, combined with the Aldelano Solar IceMaker™ and the auxiliary power feature (included on every unit), makes the Aldelano Solar ColdBox™ an ideal choice for short-term disaster relief efforts, long-term community sustainability and many industrial applications where access to a reliable power grid is limited or unavailable.

During the *Life Sustaining Solutions* event, guests had the opportunity to walk inside the box, drink water produced by the Aldelano Solar WaterMaker™, and sample refrigerated/frozen foods freshly preserved inside the box. Hollingsworth and other key Aldelano representatives were also on hand to answer questions and discuss the many applications of this new technology.

"We have been waiting for this!"
